

## **II. SCOPE OF REPORT**

SUNY's Capital Program includes four major components:

- Educational Facilities
- Hospitals
- Residence Halls
- Community Colleges

As prescribed by Education Law, this report focuses only on the current and long-range objectives of the Educational and Hospital Facilities programmed for the 29 state-operated campuses, four statutory campuses at Cornell, Alfred Ceramics, the three teaching hospitals at Brooklyn, Stony Brook, and Syracuse, and facilities at System Administration. With limited exceptions, the report includes only those capital projects with an estimated total cost of over one million dollars, for which funding has been provided either through appropriations that have been enacted, or are anticipated to be enacted, pursuant to the most recent New York State Five-Year Capital Program and Financing Plan.

The separate reporting requirement by this legislation on the Educational Facilities Program is predicated by the fact that the State provides a significant amount of the capital funding for these facilities which is the largest of SUNY's capital program.

Residence halls operate under a separate, dedicated, fee revenue program, while community college projects are planned and executed primarily by local governments. Information on these facilities is not included in this report.
