

STATE UNIVERSITY OF NEW YORK
COLLEGE AT OSWEGO

2016 CAMPUS STATEMENT

Established in 1861, SUNY Oswego is a comprehensive college enrolling more than 8,000 students, 7,100 of whom are full-time undergraduates. About 4,300 students reside in 13 residence halls on Oswego's spacious campus, located along the beautiful southern shore of eastern Lake Ontario. The city of Oswego, rich in cultural history, is 45 miles northwest of Syracuse, New York. Oswego students take advantage of more than 100 majors and minors in arts and sciences, education and business. An outstanding, supportive faculty of around 400 teacher/scholars engages students in challenging programs that encourage interaction and the vibrant exchange of ideas. The College's learner-centered approach stresses a high-quality educational experience, both inside and outside the classroom. SUNY Oswego provides essential tools to help students shape their lives, prepare for careers, and discover ways to make a positive impact on their communities.

The College's academic facilities include Penfield Library, the largest library in Northern New York with over 2.8 million books, periodicals and other materials and vast electronic information databases; state-of-the-art research and teaching labs; print and broadcast facilities for student-run media as well as a professionally directed National Public Radio affiliate; Tyler Hall with its acclaimed Waterman Theater; and the 400-acre Rice Creek Biological Field Station with its trail-crossed fields, streams and forests and Rice Pond.

The 690-acre main campus encompasses 56 buildings in an inviting and dynamic Great Lakes shoreline environment. It includes five dining centers, two athletic complexes, two fitness centers, the Mary Walker Health Center and Marano Campus Center. Learning technology infrastructure includes a robust campus-wide fiber optic network, the broad application of wireless technology, and award-winning Advanced Technology Classrooms. An extensive computer network supports more than 2,500 personal computers for student use as well as Internet access in every residence hall. Additional facilities located in Oswego, but not contiguous with the main campus, are Fallbrook Recreation Center and Oswego State Downtown. Beyond the main campus, the College maintains the SUNY Oswego Phoenix Center in Phoenix, New York, and the SUNY Oswego Metro Center in Syracuse, New York. The Syracuse Metro Center recently received approval for branch campus status.

Recently completed residential capital projects include full renovations of Johnson, Riggs, Waterbury and The Village. Johnson and Riggs Halls house the College's First Year Experience programs, and the internationally themed Global Living and Learning Center. The Village townhouse complex provides an alternative housing choice to a conventional residence hall. The project was awarded LEED for Homes Gold certification and advances Oswego's residential experience green themes and overall campus sustainable initiatives in a signature setting. The most current addition is Waterbury Hall which was completed this past summer and open this fall. These projects provide 220 renovated and modernized beds for students to enjoy.

Newly constructed and renewed major academic capital projects include the Marano Campus Center, the Shineman Center for Science, Engineering and Innovation, Sheldon Hall, Park Hall, Wilber Hall, Romney Field House, Rich Hall, Main Turf Field and Track. Previously completed were renewal of campus underground power distribution systems and central heating plant, and improvements to building exteriors and fire/safety systems. The Marano Campus Center for which acts as the heart of the campus, linking an innovative academic planning center with social, intellectual and recreational functions in one exciting, state-of-the-art facility. Past academic capital projects include a School of Business facility that combines the academic program with an active Center for Business and Community Relations, an award-winning humanities center, and a unique and attractive library café. Last year the College completed major academic projects that have transformed the east side of campus, the new 230,000-square-foot Richard S., the rehabilitation of Park Hall for the School of Education, and the award-winning exterior reconstruction of Sheldon Hall, Oswego's iconic original building which celebrated the 100th anniversary of its opening in 2013. Affiliated with the science facilities construction was a new Rice Creek Field Station study facility with classroom and laboratory space and an indoor viewing gallery. Another significant project on the south side of campus was the rehabilitation of Romney Field House for intramural recreation and intercollegiate athletics.

Design and construction is underway for subsequent phases of Tyler Hall. Construction will also begin on Scales Hall, the last of the Lakeside residences. Completing construction is the initial Phase of the Tyler reconstruction for the fine and performing arts. Projects advancing into design with anticipated construction this year are the rehabilitation of Wilber Hall for the School of Education, which will include technologically advanced practicum classrooms, and the first of three residence hall reconstructions.

The College's future focus remains consistently directed towards the Hewitt Quad, addressing further needs of the School of Communications, Media and the Arts, and Library/Innovation Information initiatives. The College continues to advance sustainable strategies through collaborative associations and public forums, in accordance with Oswego's participation in the President's Climate Commitment since 2007 and STARS 2011, and LEED Gold-targeted campus development with significant renewable and alternative energy systems.
