

The State University Construction Fund is contemplating a Design-Build delivery method for the design and construction of a new lecture hall building and related site work on the campus of the State University of New York at Binghamton. The project is in the early stages of investigation. The Fund issued a "Request for Interest" in the New York State Contract Reporter to ascertain the level of interest from the design and construction community in participating in a Design-Build procurement process for this project.

The following firms responded to the RFI to express their interest in participating in the project as either a prime contractor or subcontractor.
